Abstract

The Arabic language at Kuwait University is facing a complex system of crucial challenges; one of which is the notably increasing use of English language and its dominance in the various Departments and majors at the University.

Moreover, the English as a foreign language synergizes with another challenge which is the use of colloquial language that compete with the classical Arabic language and besieged it on its own turf in terms of presence and importance. Hence, the present study aims at revealing the actuality of the Arabic language and the extent of its presence in the academic life at Kuwait University at all levels including: teaching, academic research and the communication system at the university.

This study was conducted on a sample of academic staff amounted to 104 members at the University from the faculties of Arts and Education and Law representing the 31 percent of the total academic staff at the three faculties.

The questionnaire adopted open-ended questions giving the respondents the chance to describe the actuality of the Arabic language and the challenges facing the arabization process at all academic and scientific levels, as well as determining the cultural and social factors that led to the decline and deteriorating of the use Arabic language at the University.

The study provides answers to the following questions:

- What is the scientific role that the Arabic language plays in academic life?
